

PROFILE

Quant-focused Data Engineer with 10+ years building scalable data platforms and real-time and batch pipelines. Hands-on experience in systematic trading, market-data engineering, derivatives, back testing and automated strategy workflows, using Python and SQL. Turns financial-market data into research-ready datasets and trading analytics, and now integrating LLMs into data platforms. Also building **Quantala**, an end-to-end quantitative trading platform.

CERTIFICATIONS

Post Graduate Program in Algorithmic Trading (PGPAT), IIQF
Big Data Engineering with Hadoop and Spark from E&ICT, IIT Roorkee

PERSONAL PROFILE

Full Name:
PATOORI SHASHIDHAR REDDY
Languages Known:
English, Telugu and Hindi
Work Authorization:
South Africa
Relocation:
Open EMEA

SHASHIDHAR REDDY (SHA-SHI)

SENIOR DATA ENGINEER (AI) | Python | Quant Trading | Distributed Systems | AWS
Johannesburg, South Africa

EDUCATION

IQ Indian Institute of Quantitative Finance (IIQF)

Post Graduate Program in Algorithmic Trading (PGPAT)
2023-2024 | Online

JN Jawaharlal Nehru Technological University, Hyderabad, India

Bachelor of Technology in Aeronautical Engineering
2007-2011

QUANTITATIVE TRADING PROJECT

Q QUANTALA: Quantitative Trading & Research Platform

quantala.cloud | Founder / Builder | In progress

- Building an end-to-end platform for real-time market data, order-flow analytics, systematic strategy research, back testing and execution.
- Designed around streaming market-data ingestion, time-series / analytical storage, strategy evaluation and automated execution workflows.
- Focus areas: derivatives, market microstructure, order-flow imbalance, strategy analytics and production trading infrastructure.

PROFESSIONAL EXPERIENCE

EB ENABLE BENEFITS (ENB)

Senior Data Engineer (AI) | Johannesburg, South Africa | Contract
Aug 2025 - Present

- Building an AI-powered data platform (AI Enable Data Platform) for Enable Benefits, a Canadian company helping people with medical conditions and disabilities secure Disability Tax Credit (DTC) refunds, grants and credits through the Custom CRM.
- Designed and developed AI-ready data platforms using Python, Apache Spark, SQL and AWS to support analytics and intelligent applications.
- Integrated LLMs (Llama 3) into data workflows to automate document analysis, data extraction, summarization and information retrieval.
- Built AI-powered research workflows for querying large datasets, technical documentation and business knowledge bases.
- Designed data ingestion pipelines for PDFs, Excel, CSV, JSON, REST APIs and OCR-extracted content to support AI-driven analytics.
- **Tools:** Python, AWS, Llama 3, AI Inference, OpenClaw, Cloud Routers.

SV SVSS TRADING (PTY) LTD

Market Data Engineer | Remote Contract / Freelancer
Nov 2024 - May 2025

- Developed a trading-data pipeline PoC for systematic trading covering equities, futures and derivatives market data.
- Collected, cleaned and normalized market data from APIs and WebSocket sources; stored research-ready datasets in AWS (S3, Redshift) and structured databases.
- Designed an algorithmic strategy framework supporting trend-following and mean-reversion strategies.
- Built a custom back testing engine incorporating transaction costs and slippage to evaluate strategy performance.
- Produced daily P&L reports and performance analytics covering trading efficiency, risk exposure and strategy effectiveness.

SKILLS

Quant & Trading

- Algorithmic Trading
- Systematic Strategies
- Derivatives, Futures, Equities
- Market Data
- Backtesting
- P&L Analytics
- Risk / Exposure Analysis
- Order-Flow Research

Programming

- Python
- SQL
- Shell Scripting
- Scala
- Pandas, NumPy, Polars

Market Data & Streaming

- WebSockets
- Real-Time Data Pipelines
- Spark Structured Streaming
- Click house
- QuestDB (time-series DB)
- PostgreSQL
- Kafka / streaming concepts

Data Engineering

- Apache Spark
- Apache Airflow
- Delta Lake
- ETL / ELT, Data Modelling
- Batch Processing
- Data Quality

AI & LLM

- LLM integration (Llama 3)
- AI Inference, OpenClaw
- Document analysis & extraction
- OCR ingestion pipelines

Cloud & Infrastructure

- AWS: S3, EC2, EMR, Redshift, Athena, Lambda, SNS/SQS
- Terraform
- Docker
- CI/CD

Observability & Tools

- Grafana, Datadog
- Git, VS Code, Postman
- Web Scraping

OM OLD MUTUAL SA

Data Engineer | Johannesburg, South Africa | Contract / Hybrid

Mar 2023 - Oct 2024

- Designed, built and maintained production data pipelines supporting the Two-Pot retirement system.
- Processed and transformed large datasets using Spark, Python and SQL; delivered data to warehouse and analytics platforms.
- Automated CI/CD and implemented monitoring and failure notifications for data pipelines.
- Contributed to cloud data-platform architecture and engineering standards.
- Mentored junior engineers, conducted code reviews and took part in design reviews and sprint planning.

J JUMO.WORLD

Senior Data Engineer | Cape Town, South Africa | Remote

Oct 2020 - Feb 2023

- Built and operated large-scale data pipelines using Spark, Python, SQL, AWS, Delta Lake and Airflow.
- Designed data models and resilient ETL workflows supporting financial products and real-time access to funds.
- Improved engineering processes across design, testing, deployment, monitoring and operational support.
- Worked with Git, Jenkins, Spinnaker and Agile delivery practices in a distributed engineering environment.

SV SVSS TRADING (PTY) LTD

Data Engineer | Johannesburg, South Africa

Mar 2019 - May 2020

- Developed automated market-data pipelines for Indian equity and derivatives markets, including stock and option data.
- Built and optimized back testing frameworks for systematic trading strategies using historical market data.
- Performed exploratory data analysis and statistical modelling to support strategy research and optimization.
- Automated real-time market-data and option-chain collection; integrated datasets with trading analytics platforms.
- Worked with Python, SQL, Pandas, PostgreSQL and AWS for scalable market-data storage and analysis.

SS SONATA SOFTWARE

Big Data Engineer | Hyderabad, India

Jan 2015 - Jan 2019

- Designed and implemented large-scale data-processing solutions using Hadoop, Hive, Spark, Scala, Sqoop and Cloudera.
- Built data pipelines and analytics workflows for airline and travel clients including TUI and British Airways.
- Developed Spark / Spark SQL processing and delivered curated data to downstream analytics and reporting systems.
